📍 Bangalore, India

SUMMARY

As a Backend Developer with over 2.5 years of experience, I excel in designing, developing, and maintaining robust web applications. Proficient in Java, Spring Boot, and microservices, I have delivered scalable solutions with a strong emphasis on efficiency. I thrive in collaborative environments and have successfully led projects that prioritize timely deliveries and innovative technology solutions

EXPERIENCE

Sr. Analyst, Backend Engineer

Standard Chartered Bank

📅 07/2023 📍 Bangalore

A leading international bank providing a wide range of banking and financial services

- Developed and worked in writing testable, scalable and efficient code for handling API requests and response information from another end
- Worked on front end and back end using React, Java, Spring Boot, MUI, git, ADO, IntelliJ, JUNIT and IT test cases for REST API
- Supported team in releases
- Implemented Drools configuration for centralized rule management in the current project
- Worked on microservices - fixing vulnerabilities (aqua/nexus/sonar) and deploying in proper environments using ADO pipelines
- Utilized Azure DevOps(ADO) service to streamline project workflows
- Leveraged ADO for version control, issue tracking, and project management, contributing to enhanced collaboration within the development team
- Collaborated with QA testers to support the team during testing in time-critical situations
- Designed and implemented a HashiCorp changes after 90 days password rotation changes across around 7 microservices for prod and non-prod
- Resolved vulnerabilities and bugs across applications
- Managed critical tasks independently during senior team absences, guided teams on caching solutions, and debugged issues to ensure smooth operations
- Worked with the DevOps team to migrate DeploymentConfig to Deployment as part of OpenShift (OCP) platform upgrades
- Supported team during critical situations at the time of releases, helping teams achieve their tasks 80% of the time
- Recently worked on Multi-Factor Authentication (MFA) for the Creditmate application and successfully completed the ForgeRock certificate upgrade release
- Built a production CI/CD pipeline from scratch automating build, test, security scanning and deployment to Kubernetes/OpenShift, reducing release time

KEY ACHIEVEMENTS

All India Standard Chartered Bank hackathon 2023

Secured 2nd Runner-Up position in the All India Standard Chartered Bank Hackathon 2023.

All India (Code)* Hackathon

Secured '3rd position' in All India (Code)* Hackathon by Capgemini in collaboration with Link Innovations & AWS

SKILLS

Gmail	Java	SpringBoot	
Microservices	Git	Maven	SQL
Pega	Postman	REST	JUnit
Azure	Docker	Kubernetes	
React	IntelliJ	Data Structures	
Drools	Node.js	Red Hat	
C/C++	HTML	Xing	Nexus
Sonar	CSS	Python	
Azure DevOps	IoT	UAT	
Caching	AWS	OpenShift
